

IBM MaaS360 Mobile Security Suite

Unified mobile
management and threat
defense in one platform

UNIFIED PLATFORM

MDM + MTD

ZERO TRUST READY

Managed Does Not Equal Secure

What MDM Covers

- Device enrollment
- Configuration and policies
- App deployment and management
- Compliance reporting
- Remote lock and wipe

What MDM Misses - After Enrollment

- Phishing links in apps or browsers
- Risky or **malicious apps** added later
- **Unsafe Wi-Fi** and network attacks
- Device compromise or **rooting**
- Active **malware** or **spyware** on the device
- Exploited OS or app vulnerabilities

❏ A **security gap** emerges from relying on management without threat defense, or threat defense without management - a full protection requires both

Why the Mobile Security Gap Is Growing

Perimeter-Free Work

BYOD and Mixed-Use Devices

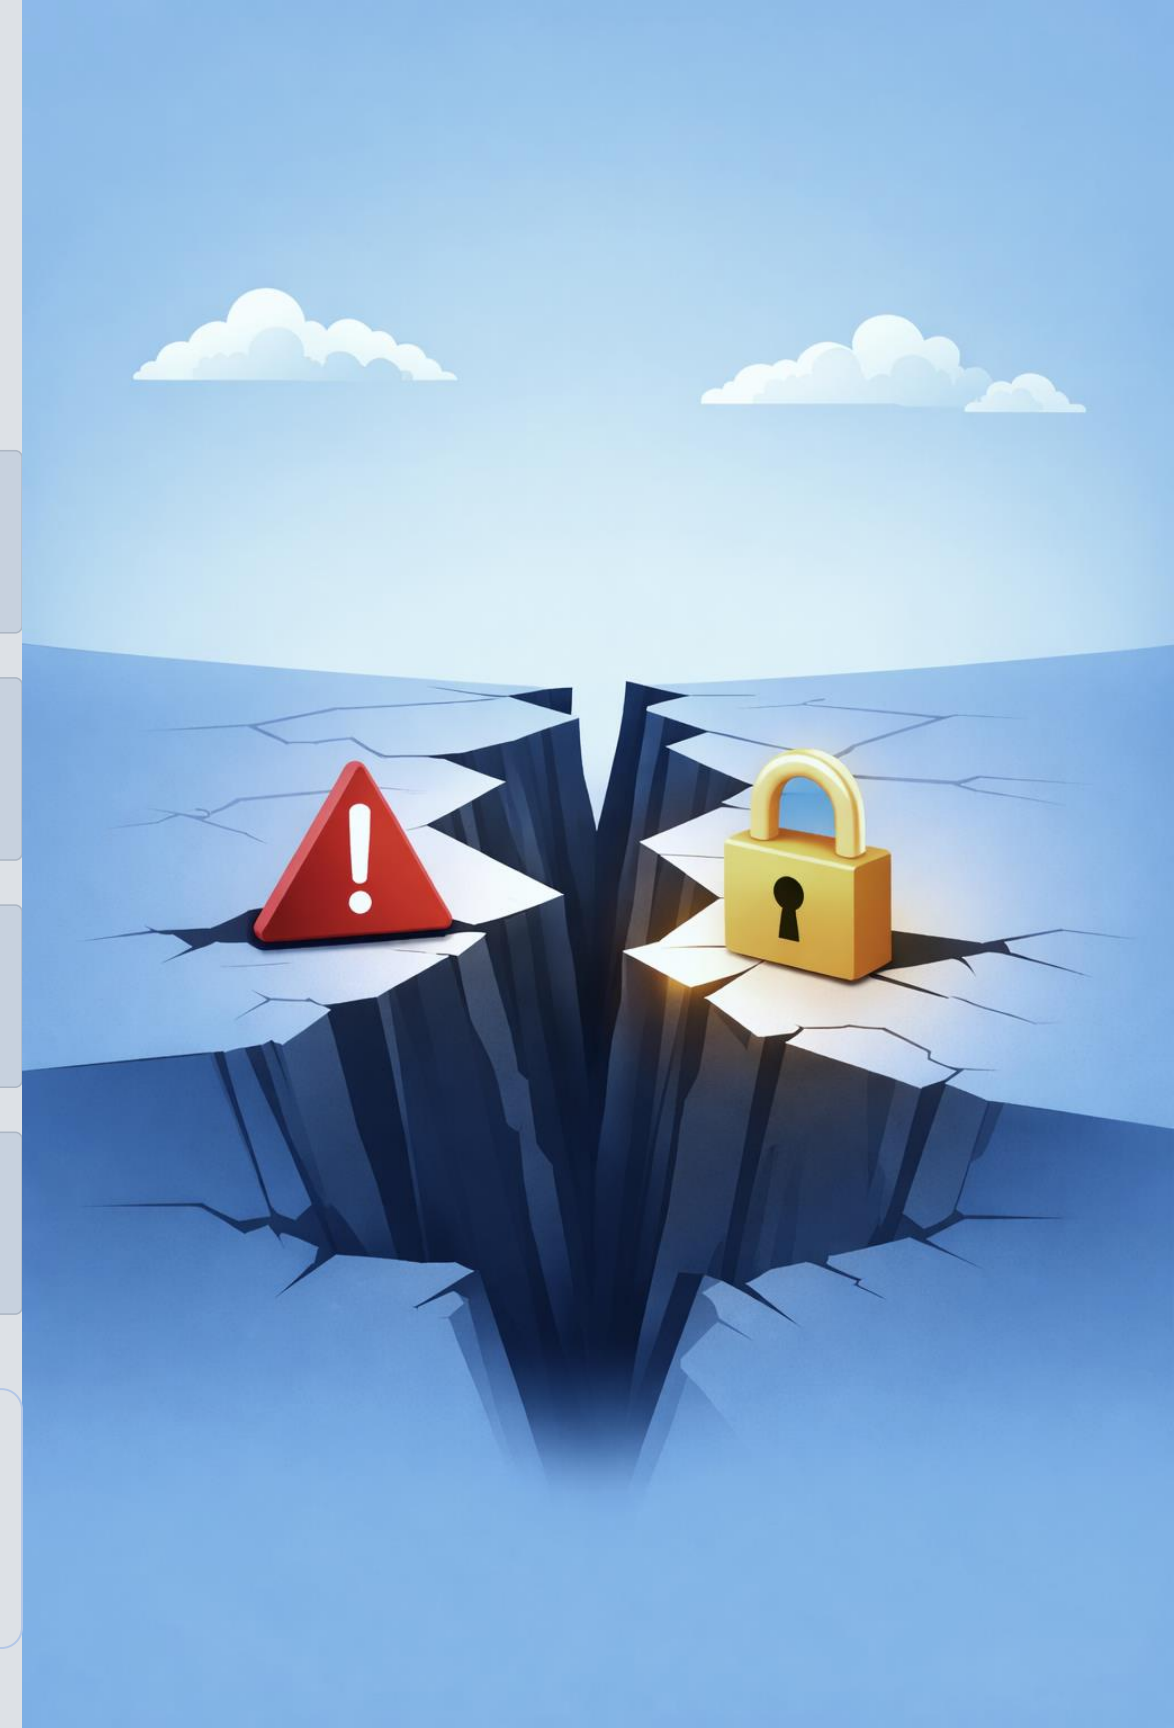

Phishing Starts on Mobile

Mobile Accesses Critical Systems

Business risk, not just IT risk: A mobile compromise is not a device incident — it is a potential data breach, regulatory event, or identity takeover. The risk belongs on the management's agenda, not just the help desk's queue.

What Is IBM MaaS360 Mobile Security Suite?

Solution	Essentials	Deluxe	Premier	Enterprise	Mobile Security
Device management	✓	✓	✓	✓	✓
App management	✓	✓	✓	✓	✓
Identity management	✓	✓	✓	✓	✓
Advisor	✓	✓	✓	✓	✓

IBM MaaS360 Mobile Security Suite is a cloud-based, unified endpoint management (MDM) and mobile threat defense (MTD) platform that gives organizations a **single solution to manage, monitor, and protect mobile devices** — without deploying or integrating separate tools from multiple vendors.

360° Device Management — The MDM Foundation

Unified Device Visibility

A single view of device health, inventory, apps, and compliance across enrolled endpoints

Automated Compliance Actions

Set compliance rules and let MaaS360 respond automatically to policy violations

Fast Enrollment & Provisioning

Streamlined enrollment and provisioning reduce IT effort and speed device readiness

App Distribution & Control

Manage app delivery, access, and BYOD separation from a single platform

Remote Management

Take remote action on enrolled devices to manage incidents, loss, and offboarding

AI-Driven Insights

Surface risky devices and prioritize response with proactive AI-powered insights

360° Mobile Threat Defense — Active Protection Layer

Device-Wide Phishing Protection Blocks phishing links across browsers, SMS, messaging apps, and email

Malware & Malicious App Detection Scans apps for malware, suspicious behavior, and excessive permissions

Threat Visibility & Dashboards Provides centralized threat visibility, risk scoring, and actionable insights

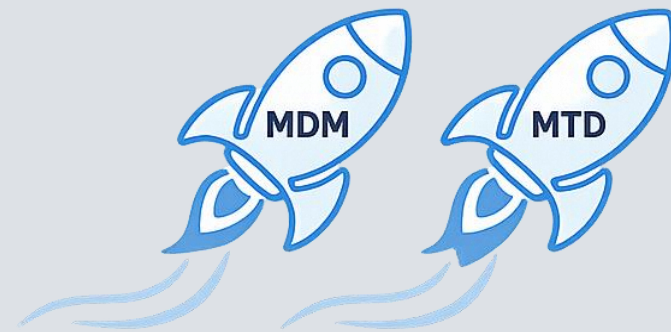

Network Attack Detection Identifies network-based threats before data or credentials are exposed

Device Compromise Detection Detects rooted, jailbroken, or otherwise compromised devices in real time

Automated Threat Remediation Responds to detected threats with immediate enforcement through MDM

IBM Mobile Security Suite beats Separate Tools

- Two vendors
- Two consoles
- Manual integration required
- Delayed threat response
- Higher total cost
- Complex procurement

- One vendor
- One console
- Built-in integration
- Automated threat-to-action response
- Lower total cost
- Single procurement

Pricing & Packaging

MaaS360 Mobile Security Suite

MDM + Mobile Threat Defense — unified in one platform. Full device management capabilities plus continuous on-device threat detection, phishing protection, network attack detection, and automated remediation

From

\$6.00

per device / month — or **\$12.00 per user / month**

Previously \$7.50 per device

Core Unified Endpoint Management for organizations that need device enrollment, configuration, app management, and compliance policy enforcement across their mobile fleet.

Contact Sales

For organizations that need management without the full threat defense layer

What's Included in the Mobile Security Suite Price

- Full UEM / MDM platform (iOS, Android, macOS, Windows, ChromeOS)
- Mobile Threat Defense — phishing, malware, network, compromise detection
- Unified console — management and security in one interface
- Automated threat-to-policy enforcement
- AI-powered insights and device risk scoring
- Cloud-delivered — no on-premise infrastructure required

Business Outcomes & Use Cases

Securing BYOD & Remote Work

Enable secure use of personal devices for work with clear separation of corporate and personal data, policy enforcement, and continuous mobile threat protection

Protecting Frontline & Mobile-First Employees

Give frontline and mobile-first workers managed, secure, and consistently configured devices with protection from phishing and network threats

Strengthening Zero Trust With Mobile Risk Signals

Feed real-time mobile risk signals into conditional access policies so Zero Trust decisions reflect current device security posture

Reducing IT Complexity & Vendor Sprawl

Replace separate tools with a single platform that lowers integration overhead, streamlines management, and provides one point of support

Manage Devices. Secure Them in Real Time.

Thank you!
