

IBM Security MaaS360 Unified Endpoint Management

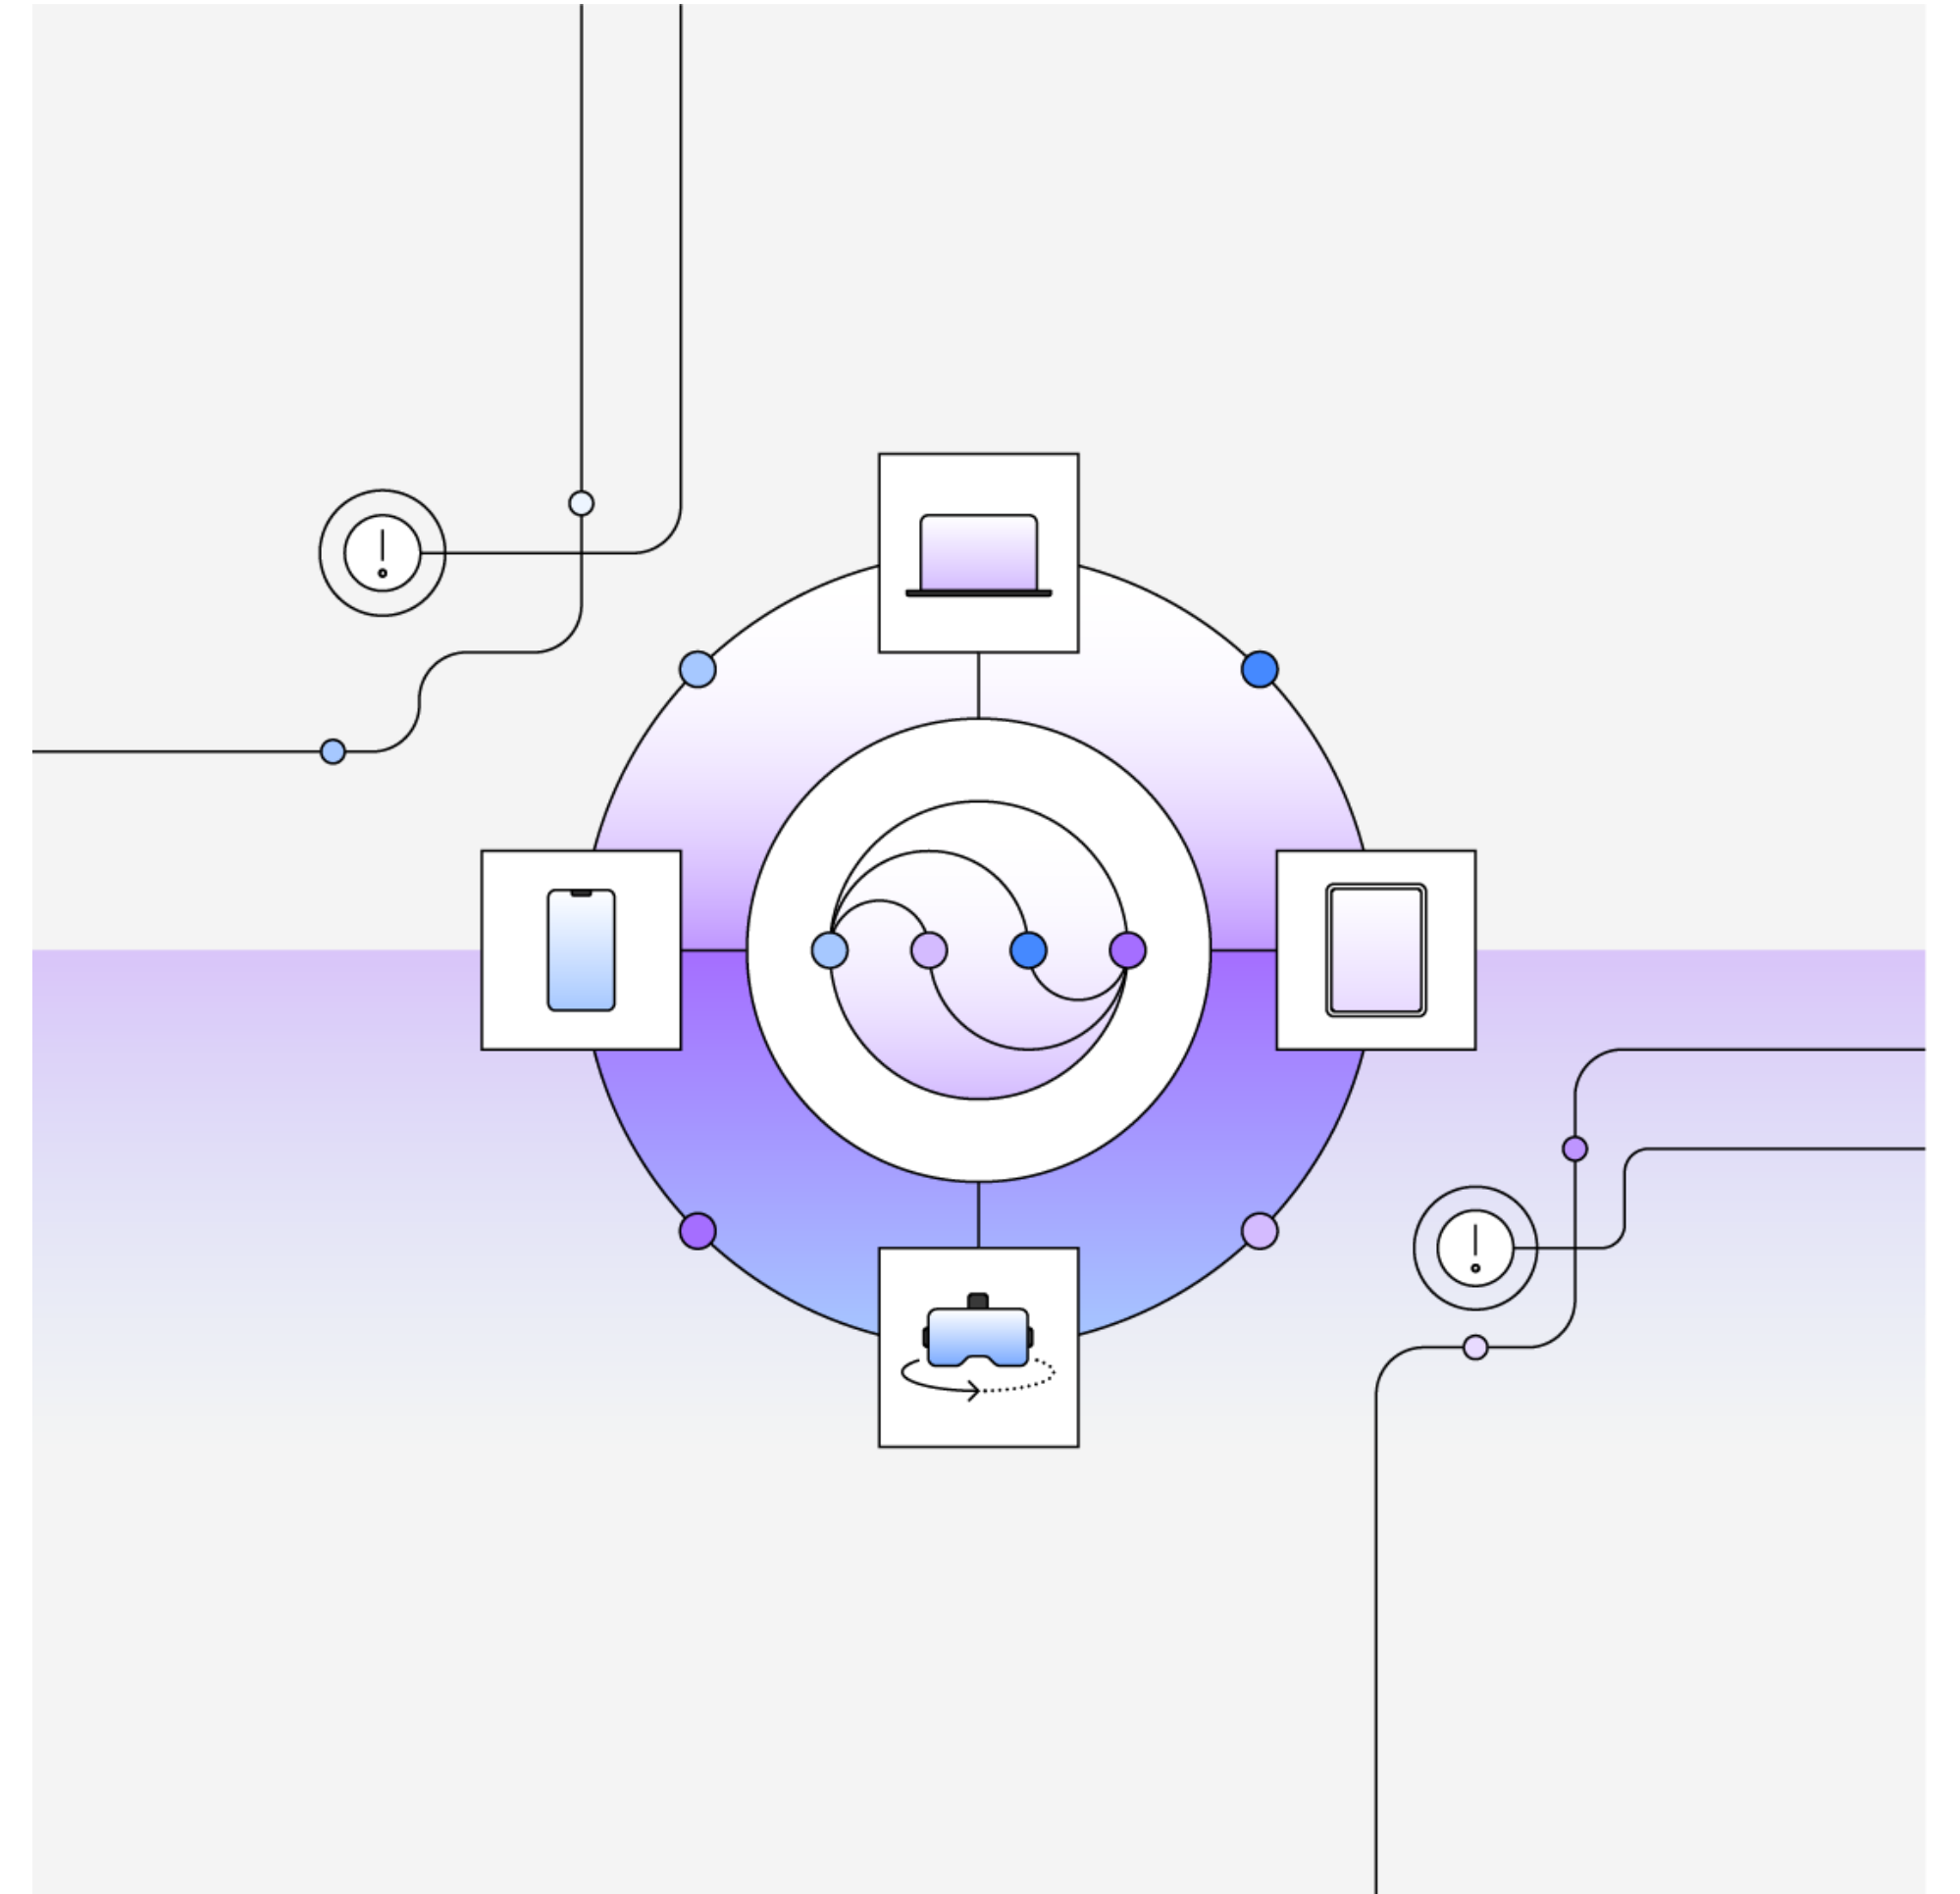

Level 1 client presentation

—
JOE PAPPANO
IBM Security MaaS360
Senior Product Management

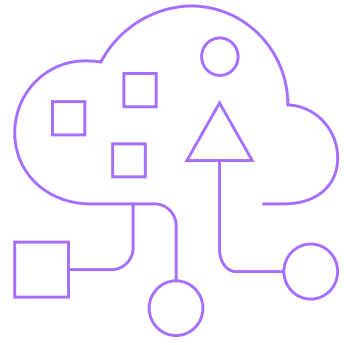

Agenda

- Today's evolving threat landscape
- Mobile business landscape
- MaaS360 vision and strategy
- MaaS360 differentiation and benefits
- Next steps

Top four security challenges heard from clients

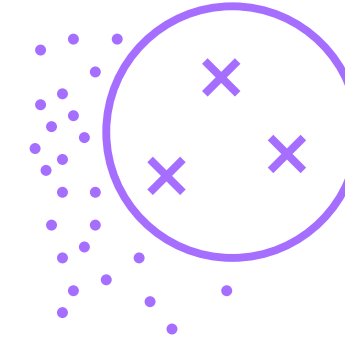

Protect data
across the
hybrid cloud

We need to secure critical data as a shared resource across the enterprise

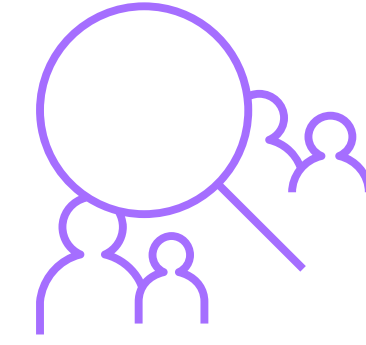

Secure remote
workers and
consumers

We need frictionless control over who has access to critical applications and data

Predict, prevent,
and respond to
modern threats

We need to eliminate ransomware and threats with greater speed and visibility

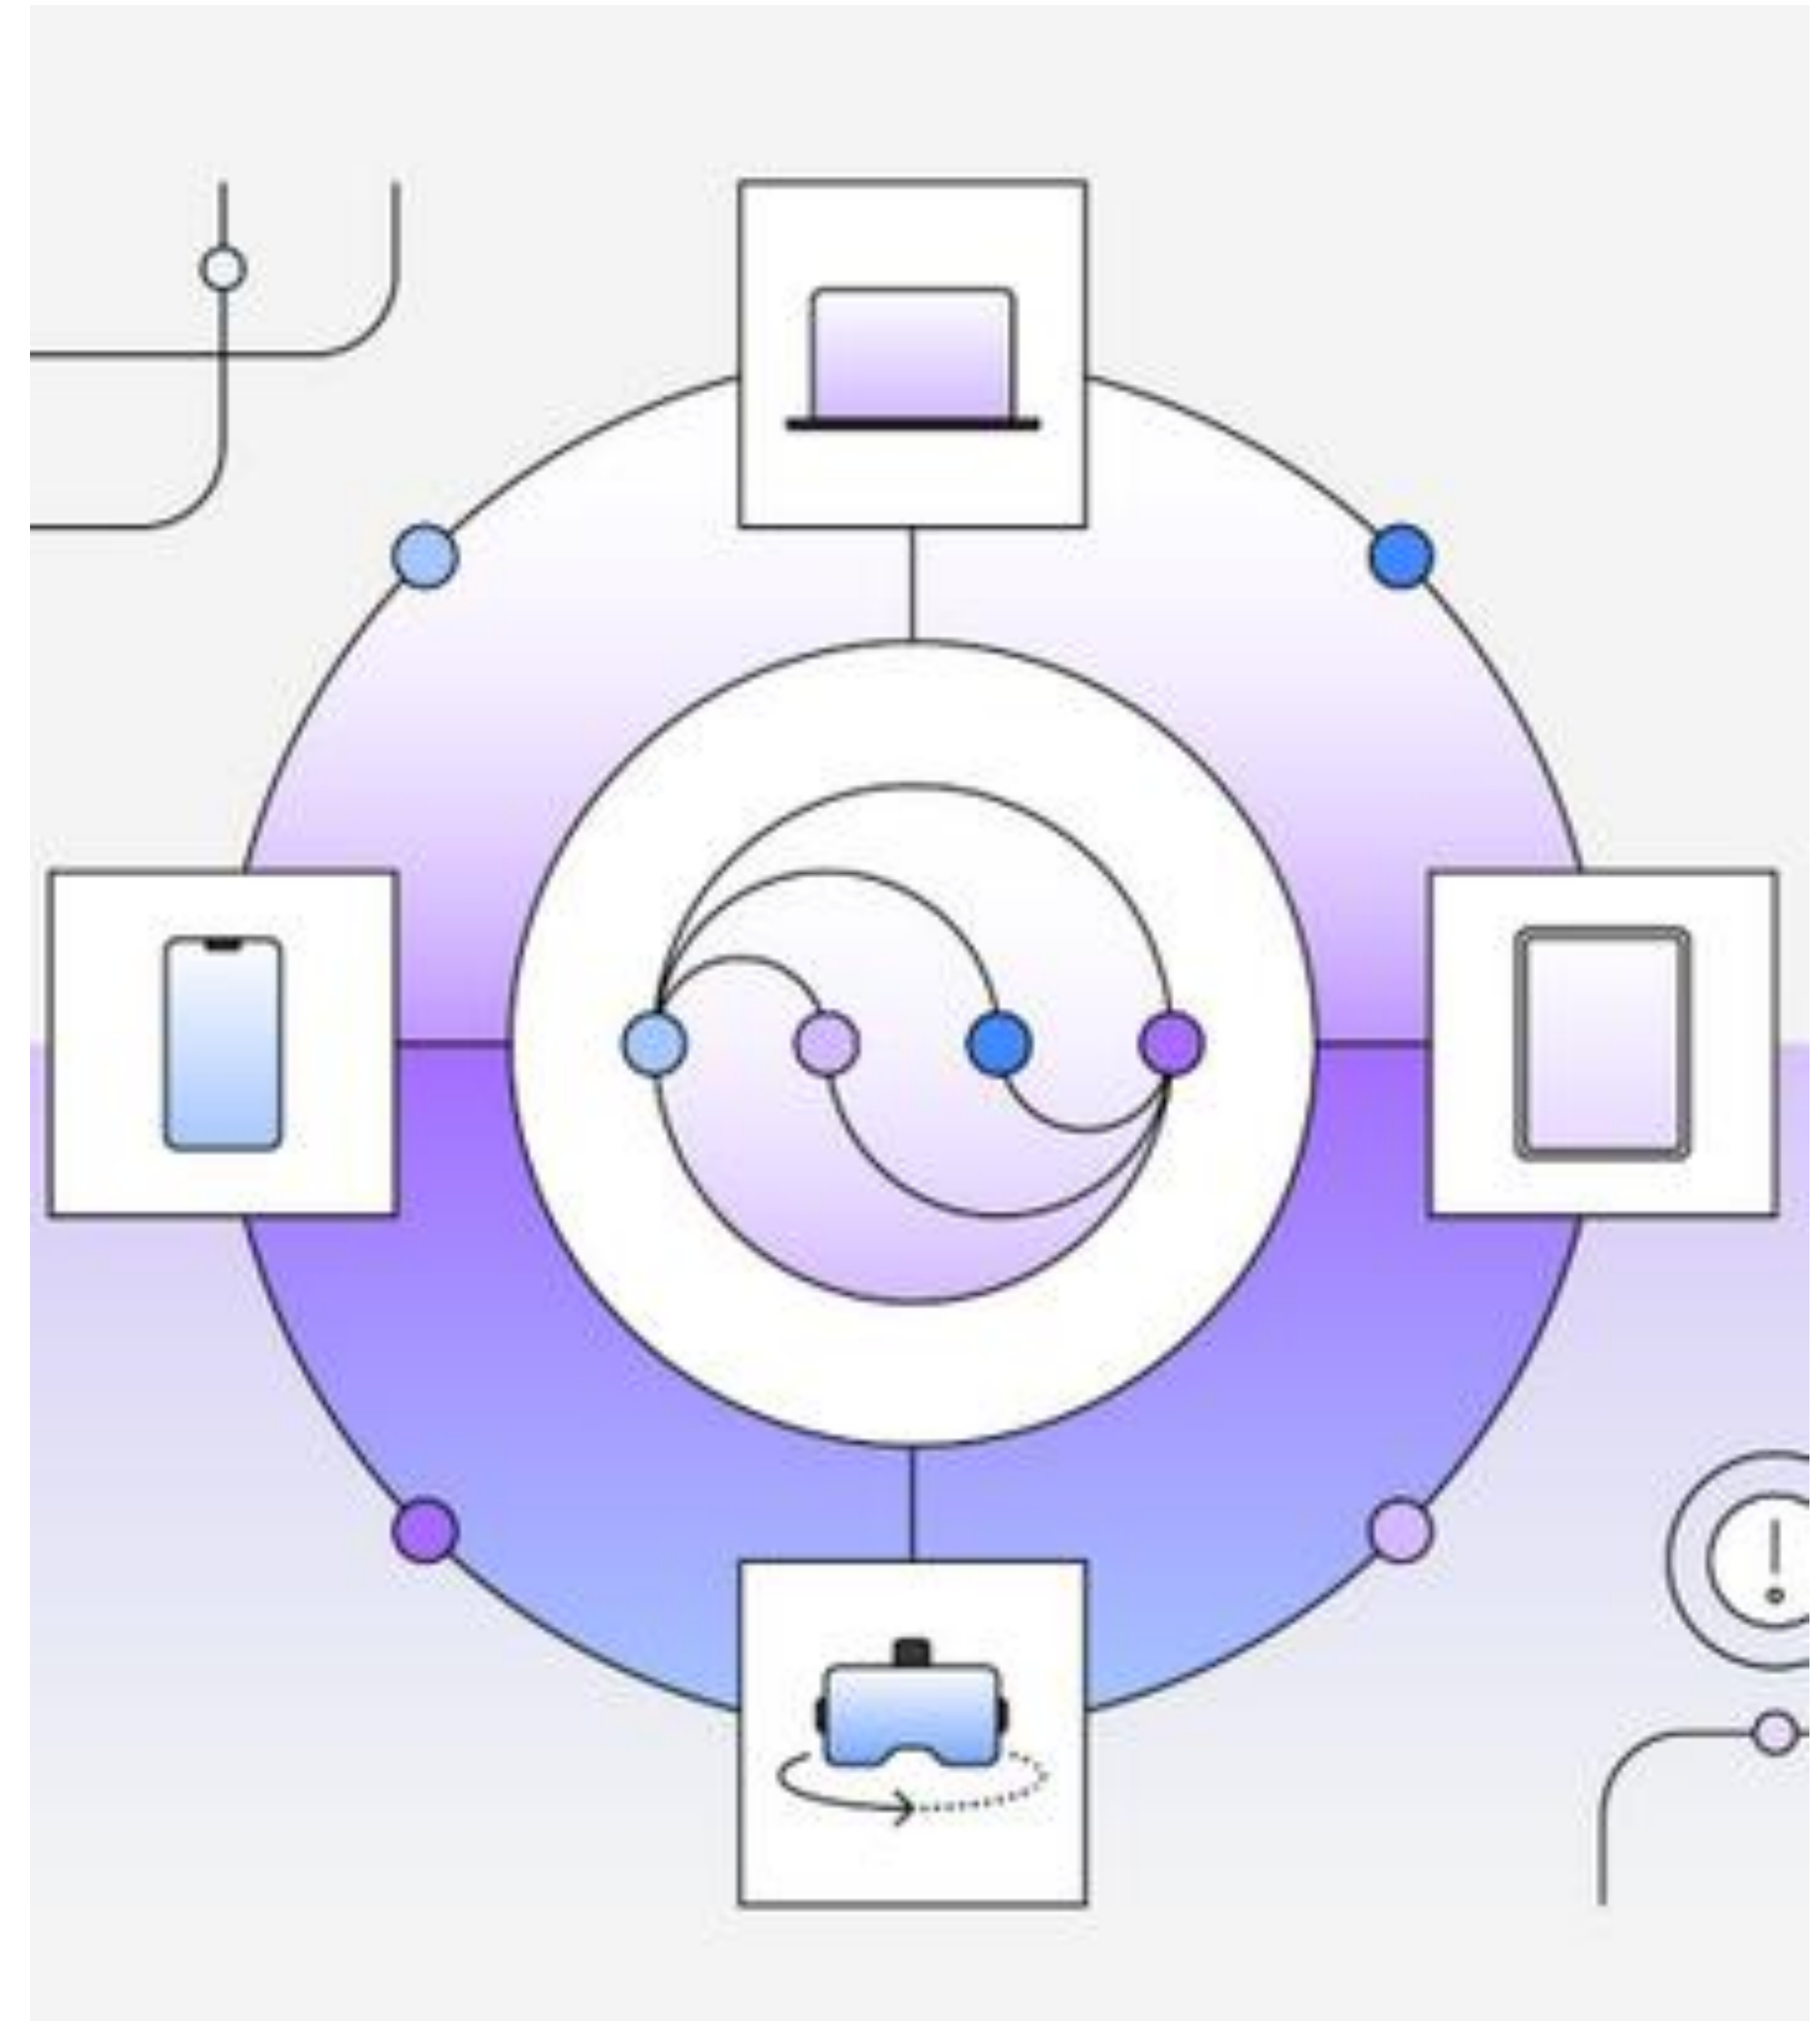

Improve the
effectiveness
of security programs

We need help to assess, build, and run security that supports business goals

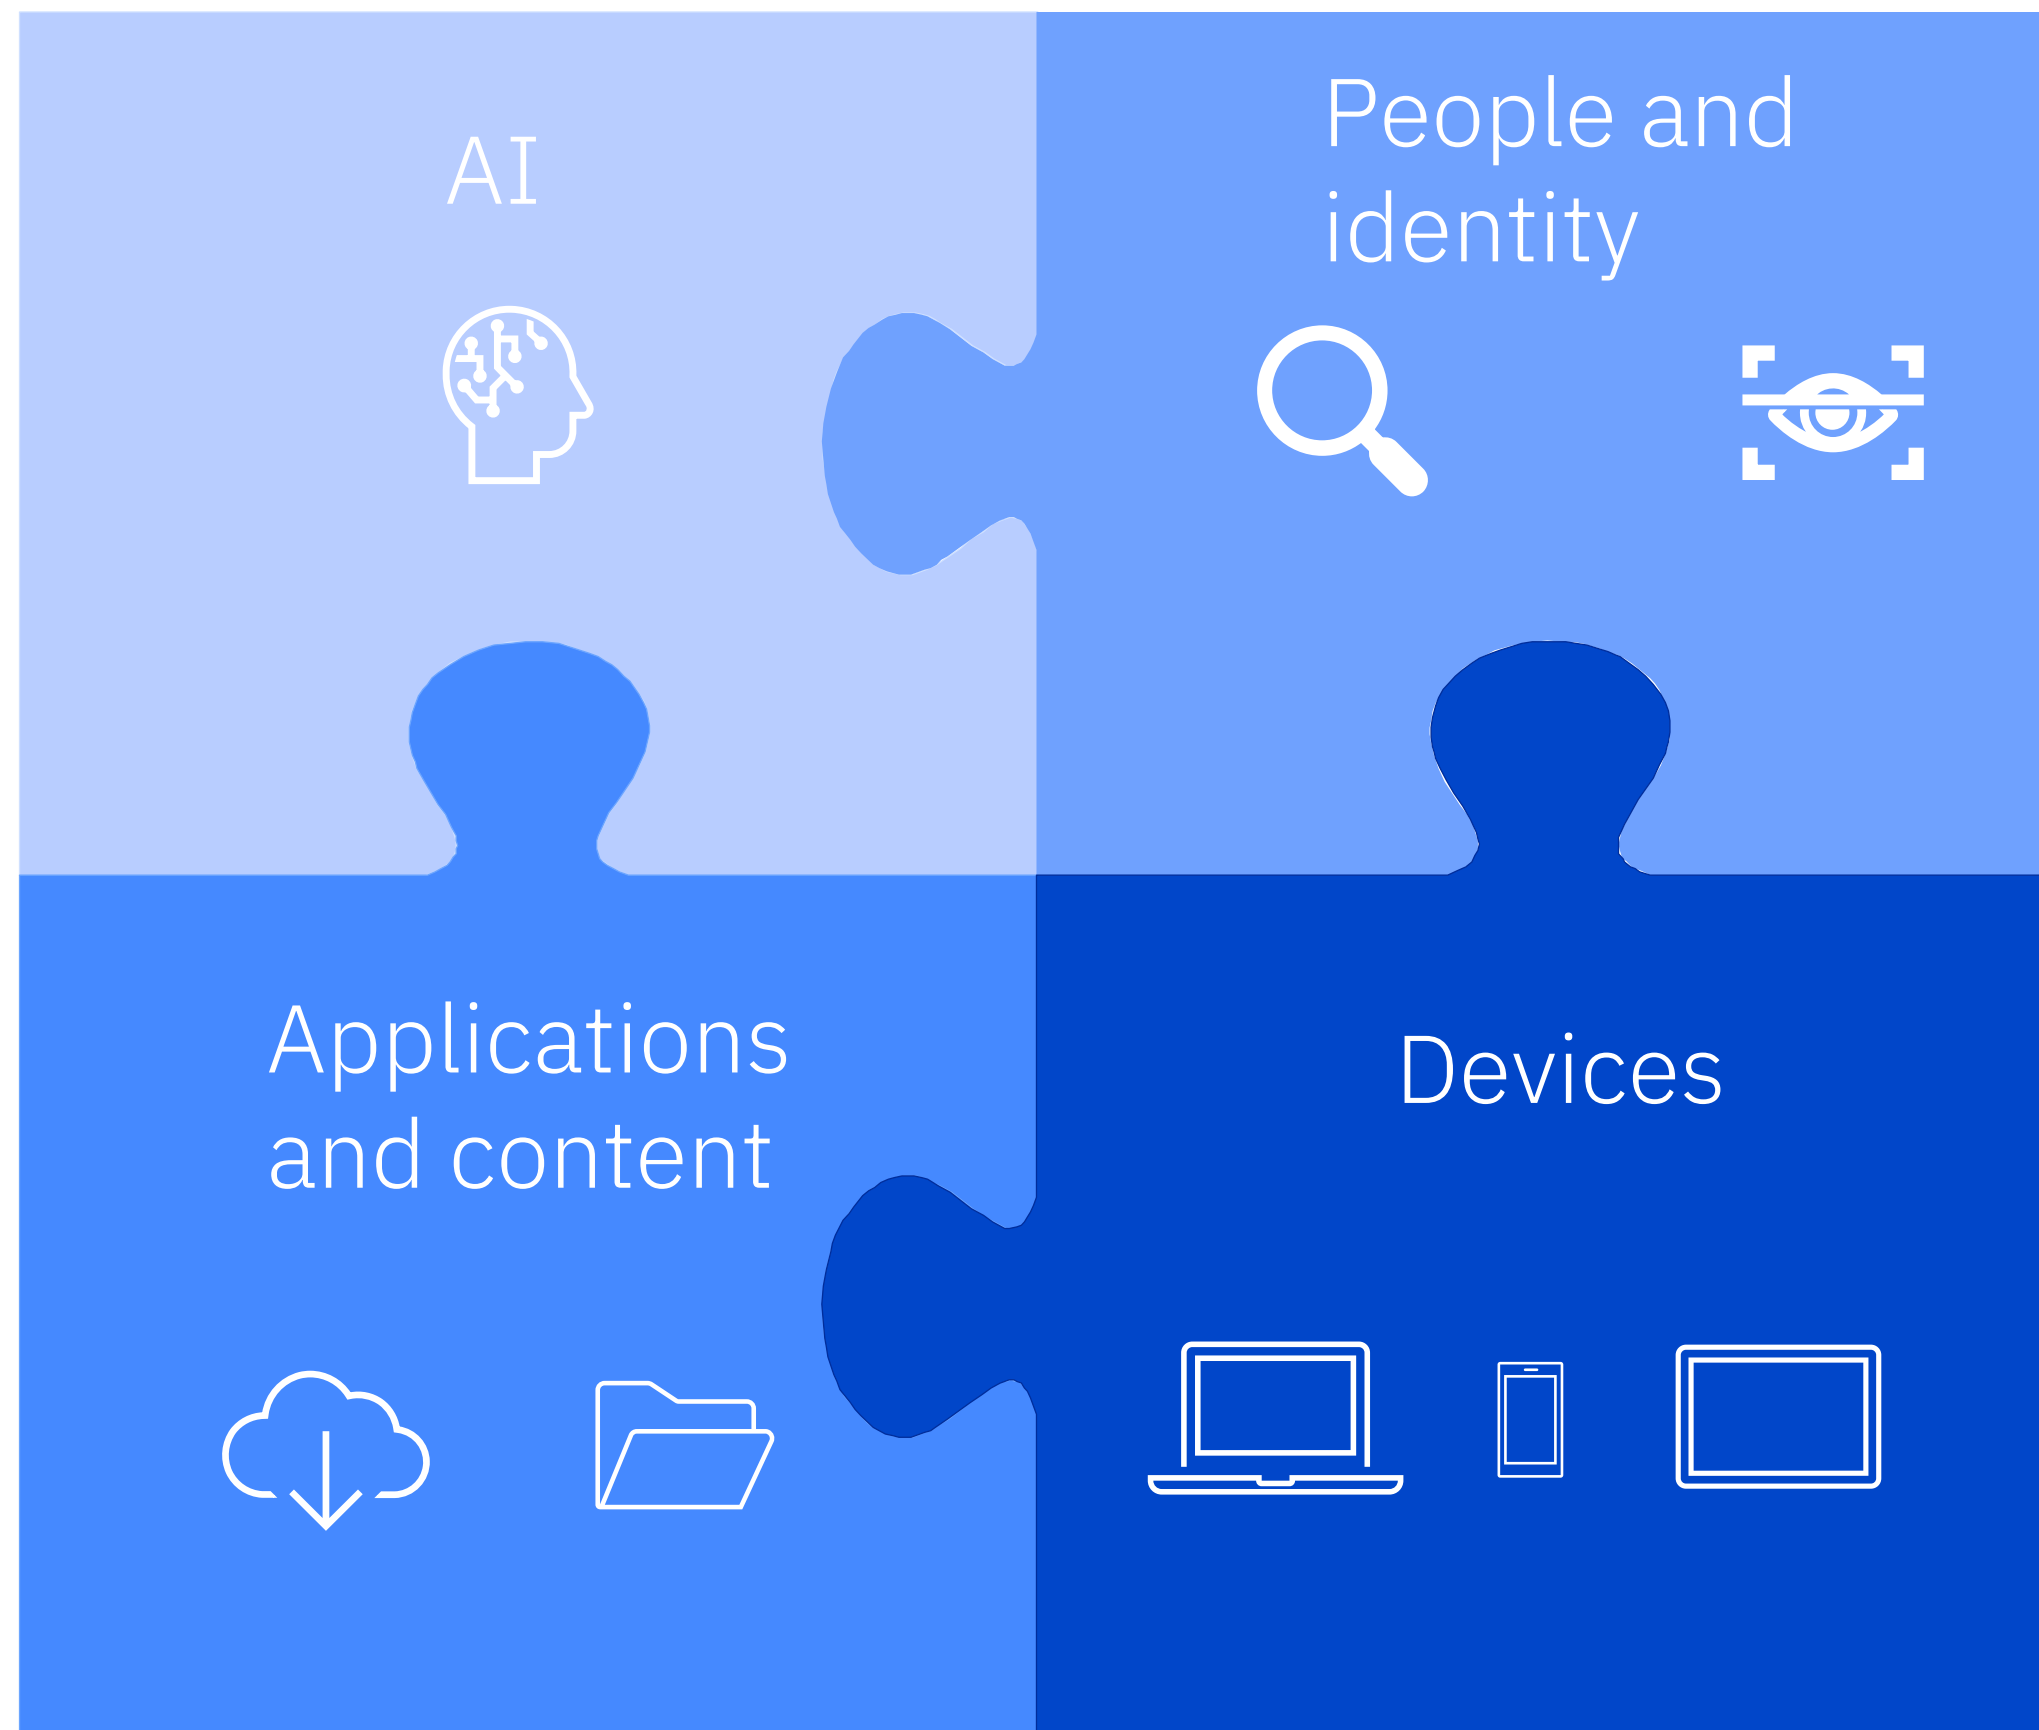

Today's mobile business landscape

- Employees expect frictionless anywhere, anytime access from any device, causing concerns around security and identity
- IT leaders must contend with increasingly complex device environments as digital transformation continues
- Security leaders are faced with an expanded attack surface for phishing, malware, and other endpoint threats
- BYOD and privacy concerns require separation of work and personal usage
- Multiple use cases and initiatives vary by industry and device type

IBM Security MaaS360

Unifies, secures, and manages
devices and users

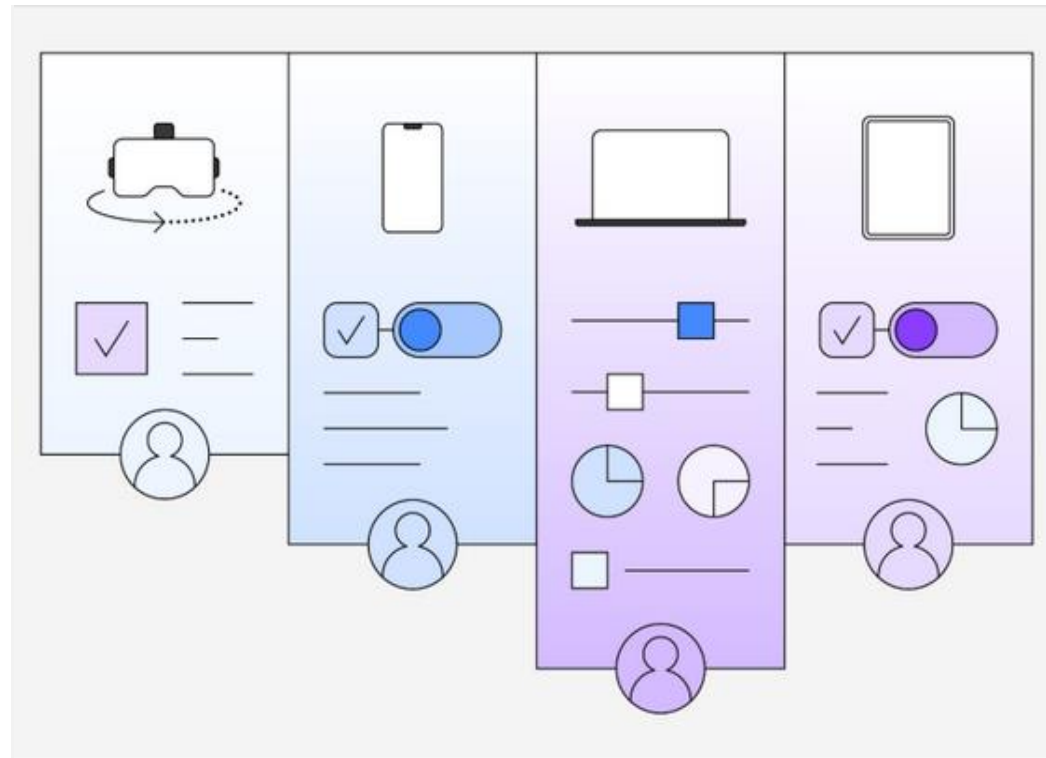

Unified Endpoint Management

- Provide best-in-class Unified Endpoint Management coverage across all endpoints
- Enable co-existence with traditional endpoint management tools for laptop/desktop management
- Enable support for purpose-built and industry-focused use cases
- Expand admin and enable end user experience management
- Expand device, app, and end user analytics and automation

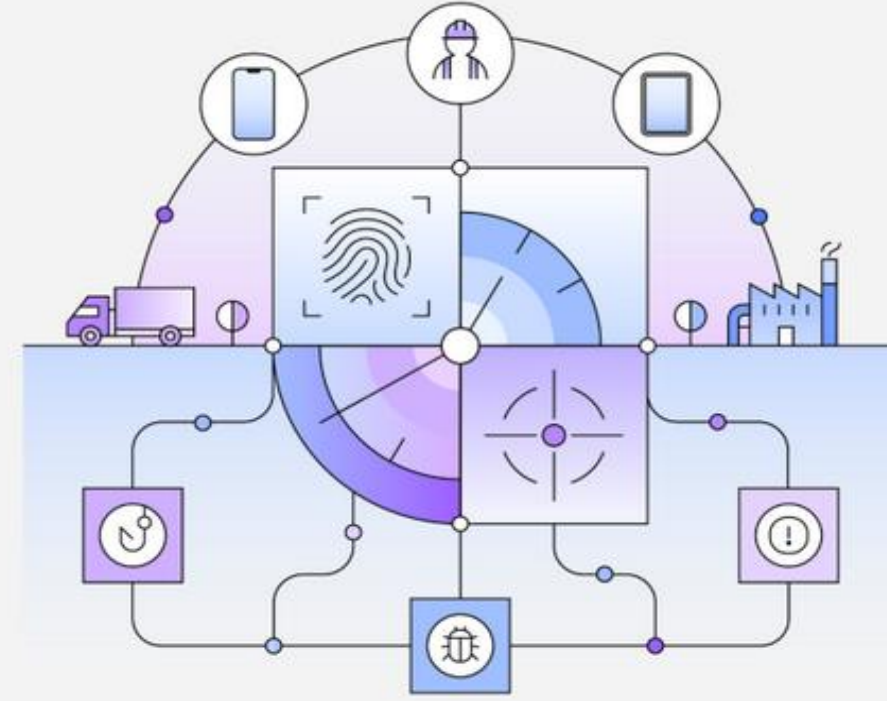

Zero Trust Endpoint Security

- Expand security detection, prevention and response on mobile endpoints
- Expand security analytics to enable response based on user and device risk posture
- Enable Zero Trust and Extended Detection & Response use cases via integrations with IBM Security stack

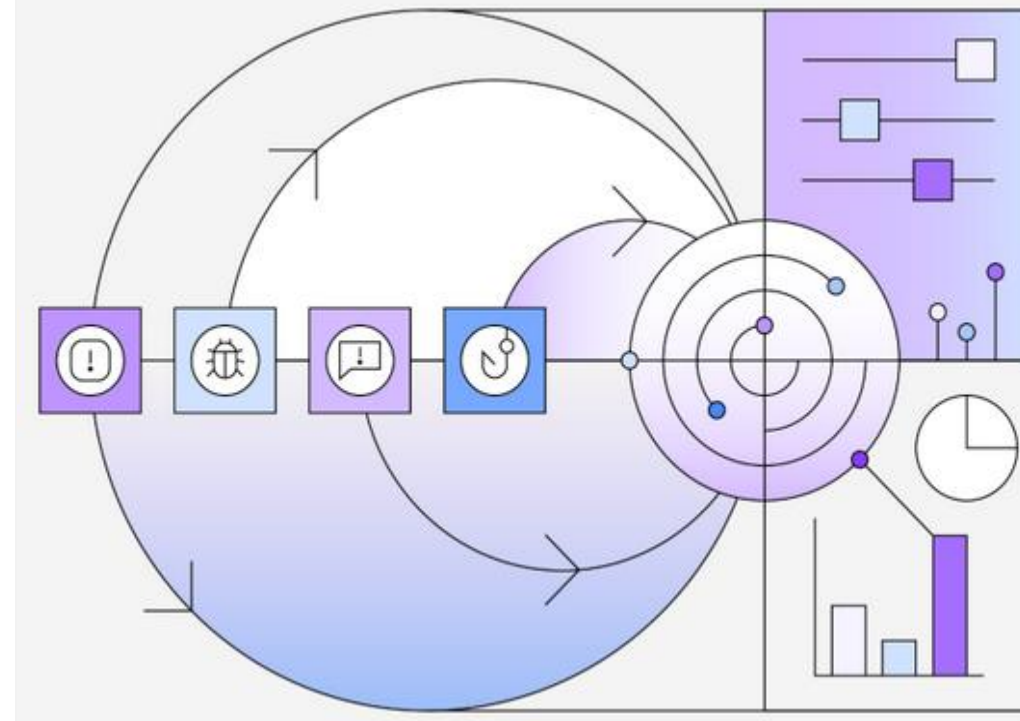

MaaS360 Strategy

Unified endpoint
management for
hybrid workforce

Specialized
frontline device
management

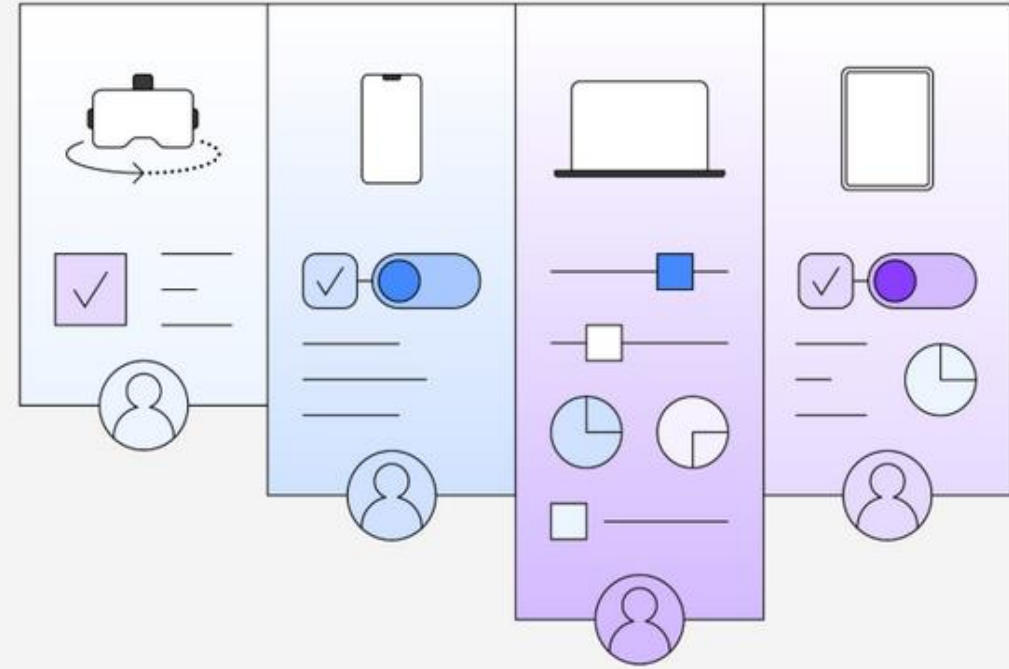

Integrated endpoint
security

Improved digital
experience
outcomes
with gen AI &
analytics

Modern Device Management

Unified endpoint
management for
hybrid workforce

Android Management

- Securely manage and support any device that uses Android OS
- Email
- Data
- Applications
- Other corporate resources

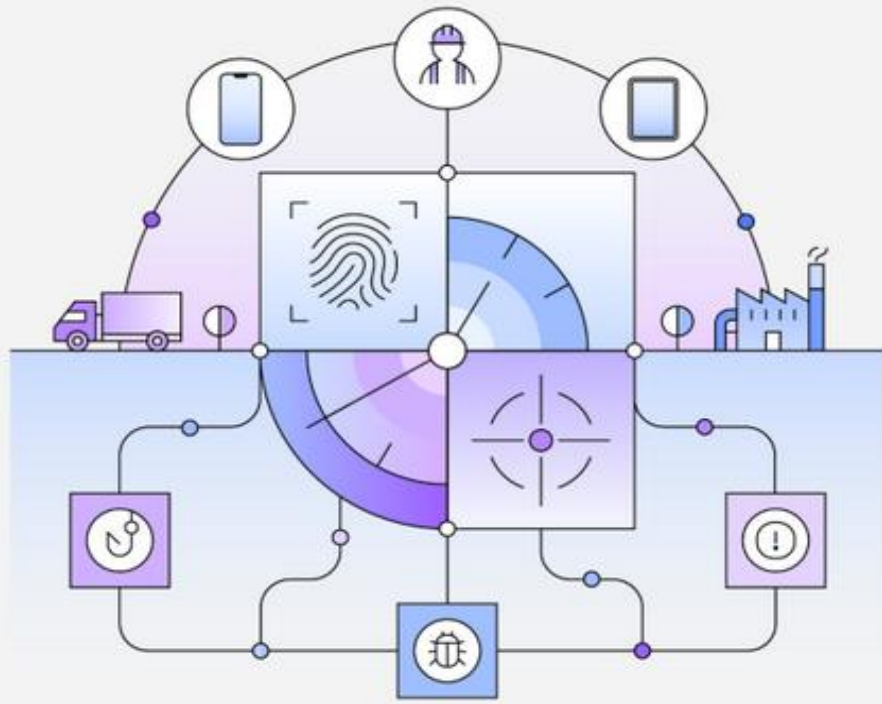

Apple Management

- Security manage and support Apple devices that use the latest features of iOS and MacOS
- Immediate enrollment
- Custom apps
- Set up advanced policies and compliance rules
- Orchestrate patching

Laptop Management and CMT Integration

- Combine and unify modern management and traditional client management to offer a comprehensive, easy to use offering, that impacts all areas of Windows and Mac management

Frontline Device Management

Specialized
frontline device
management

Simplify management of
purpose-built and
unattended frontline
devices for industry-
specific use cases

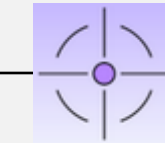

- Scanners, AR/VR devices: warehouse workers
- Showroom kiosks: Retail employees
- Handheld devices: Field technicians
- Purpose-built devices: truck drivers
- Tablets: medical professionals

Setup

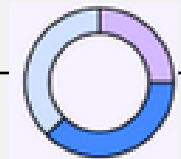

- Zero Touch device setup
 - Remotely configure devices, provision connectivity
- Real-world over-the-air device visibility

Manage

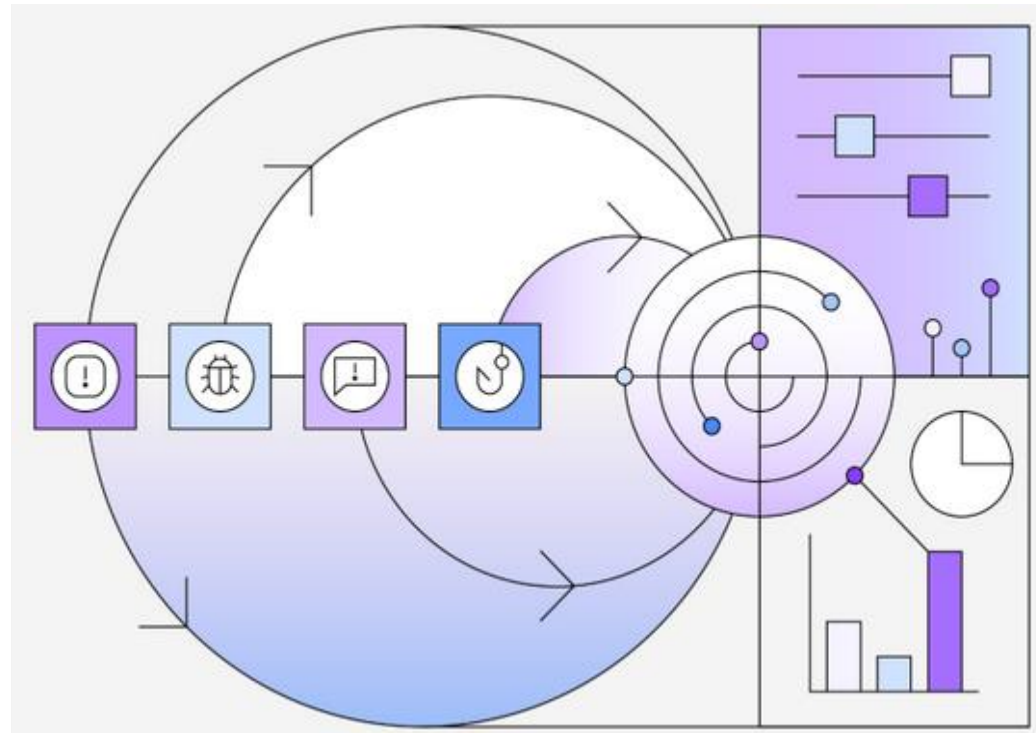

Remotely access,
troubleshoot, and
attended and
unattended
devices

Remediate

- Continuously discover 3rd party application vulnerabilities
- Automate application updates based on risk information

Endpoint Security Strategy

Integrated endpoint
security

Simplify Adoption

Automate security detection, prevention,
and response on mobile endpoints

Detect & Remediate Threats

Detect and remediate advanced threats,
leverage security analytics to enable response
based on user and device risk posture

Open Architecture

Enable Zero Trust and XDR use cases via integrations
with IBM Security stack and other
advanced cybersecurity tools

IBM MaaS360: Gen AI and analytics

Improved digital
experience outcomes
with gen AI & analytics

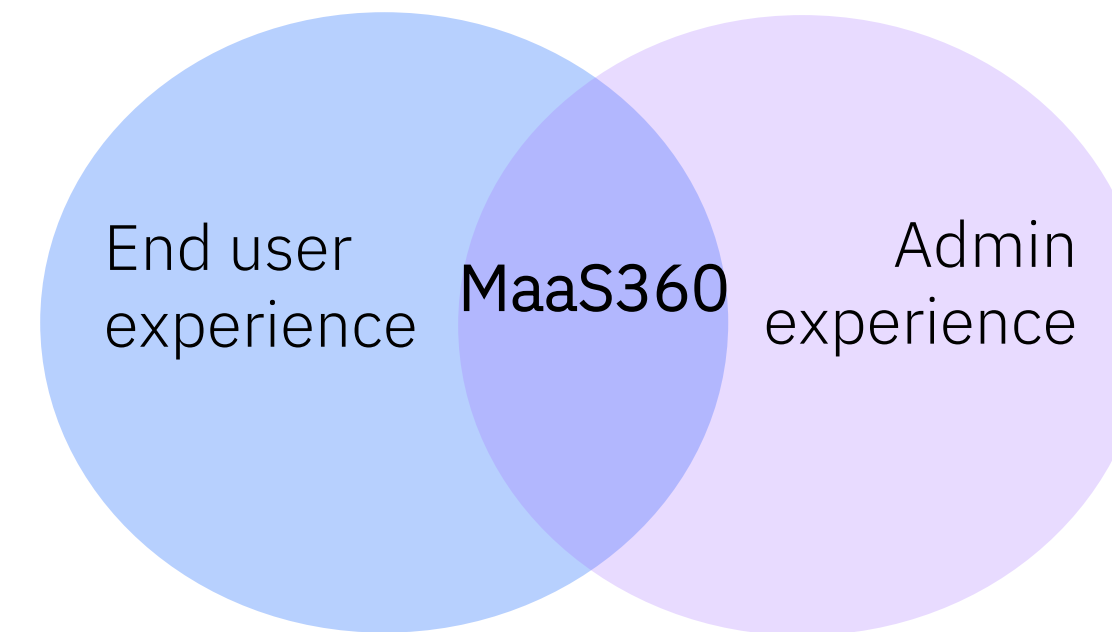

Analyze user
behavior and device
health

Reduce security risks
Prediction, trends

Analyze historical data
Predict potential issues
Prevent inadvertent user
mistakes

Improve productivity
Unusual behavior, device hygiene

Detect anomalous activity
Dynamically adjust system
resources

Provide UEM insights
for admins to make
informed decisions

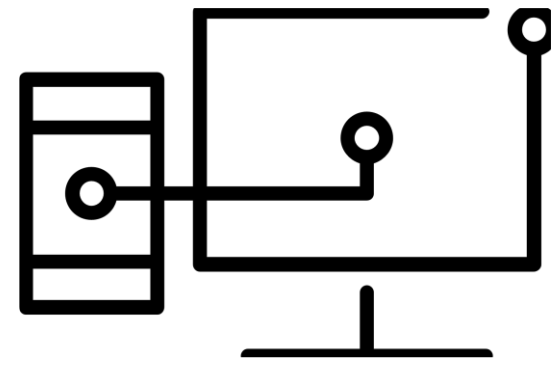

Improve Security
and Compliance posture
Security dashboard, user risk
analytics

Visualize threat patterns, suspicious
activities, and potential threats

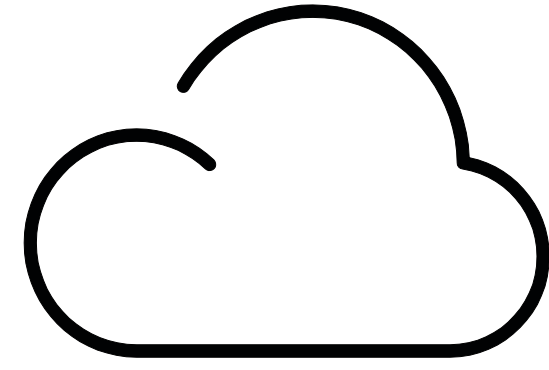

Improve admin efficiency
Time to value, analytics, insights,
automation

Provide visibility into patterns
Recommend solutions

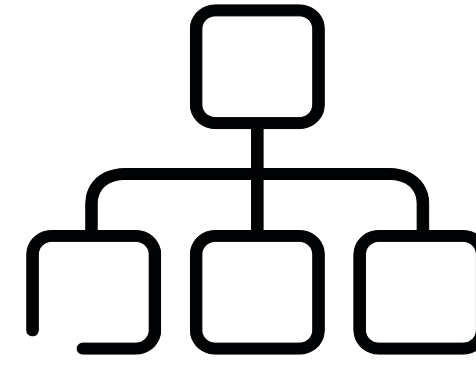

What sets IBM MaaS360 apart?

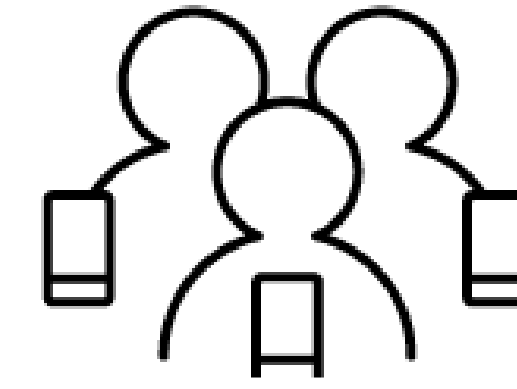

Complete UEM
of mobile devices,
laptops & things

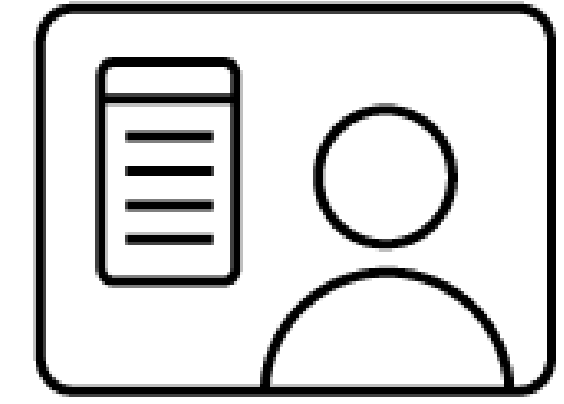

Best-in-class
cloud
on a mature, trusted
platform

Open
platform
for integration with
leading IT systems

Industry-best user
interfaces
for app catalogs &
workplace container

Dedicated to your
success
with 24x7x365 support by
chat, phone, email

**With
Watson™**

for actionable insights
& cognitive analytics

Fast deployment

Simple, self-service provisioning
process designed for maximum
configurability

Effortless scalability

Trial instantly becomes production
environment with ability turn up new
devices, users, apps

Automatic upgrades

Continuously updated daily with new
capabilities and same-day OS support for
the latest platform

Why IBM?

IT and security leaders can identify the costs and benefits of their UEM investment in MaaS360

\$12.6 M

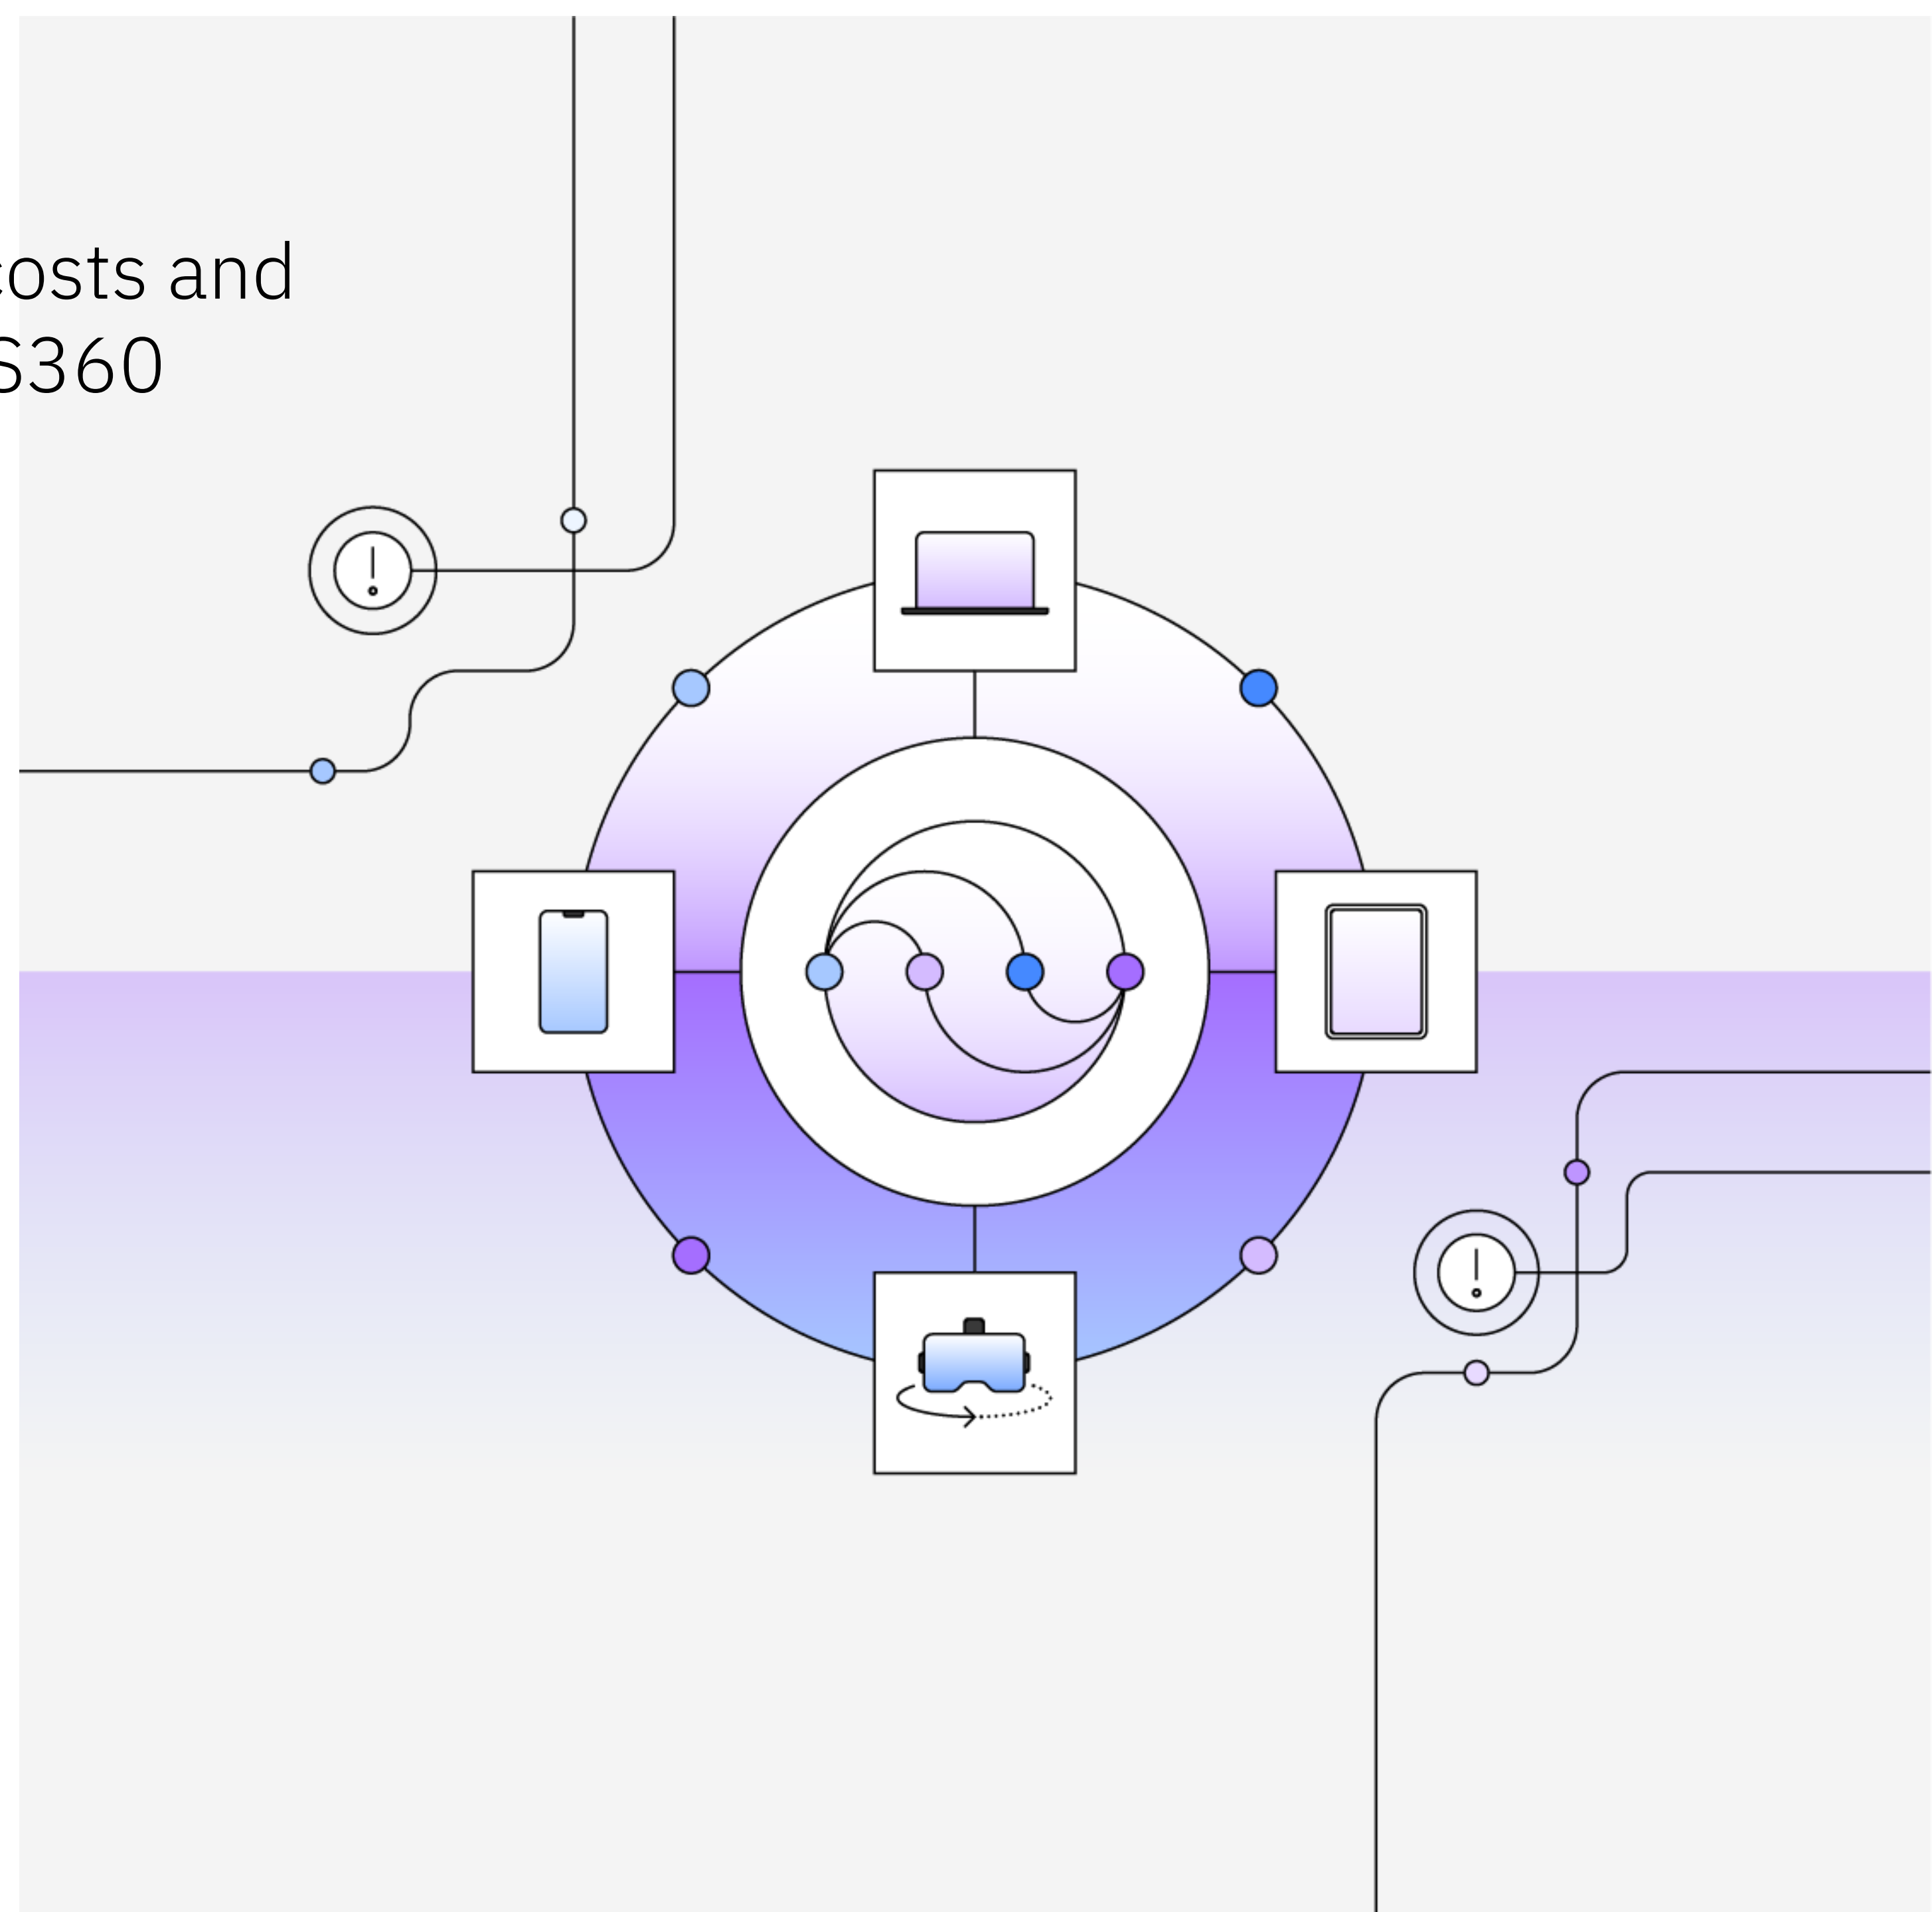

Saving in user productivity over 3 years

50%

Reduction of the risk of a security breach

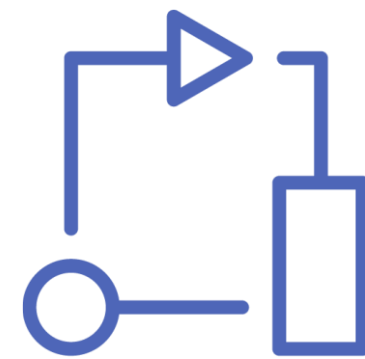

191%

Return on Investment

Next steps

Value assessment

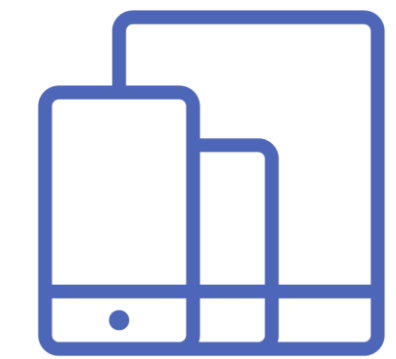

Investigate the current state of your unified endpoint management with IBM experts and determine potential areas for improvement.

Product demo

Try IBM Security MaaS360, an intuitive and user-friendly experience with the industry's first AI approach.

Free trial

Get started with a free trial of IBM Security MaaS360 or book a consultation with an IBM expert to discuss how it can advance your specific business needs.

Thank you
